

GRAYS HARBOR COUNTY

STATE OF WASHINGTON

February 21, 1985

Mr. Dennis Priebe, Public Works Director
Department of Public Works
City of Hoquiam
City Hall
Hoquiam, WA 98550

RE: Hoquiam Sanitary Landfill

Dear Mr. Priebe:

The 1985 permit for operation of the Hoquiam Sanitary Landfill is issued with requirements for completion of a Geohydrological study in 1985, as outlined in the enclosed directive from the Department of Ecology dated January 18, 1985. Our department would reasonably expect that a scope of work be submitted by June 30, 1985 and the final Geohydrological report by December 31, 1985. Items to be addressed in the report are outlined in the above referenced directive.

Recent samples taken by our office, the City of Hoquiam, and the Department of Ecology confirm the presence of unacceptable levels of leachate. The need for control of this discharge is obvious and we require that plans be developed and submitted as soon as possible to our office for review.

Sincerely,

Paul Sweet, R.S.
Director of Environmental Health

GENERAL CONDITIONS

1. The term "disposal site" is used in this permit as defined by WAC 173-301.
2. The conditions of this permit shall be binding upon, and the permittee shall be responsible for all acts and omissions of all contractors and agents of the permittee.
3. All surface water runoff shall be diverted away from the landfill.
4. The disposal site operation shall be in strict compliance with WAC 173-301.
5. Authorized representatives of the Department of Ecology and local health representative shall be permitted access to the premises of the waste disposal site at all reasonable times for the purpose of making inspections, surveys, collecting samples, obtaining data and carrying out other necessary functions related to this permit.
6. This permit is subject to termination if the Department of Ecology or Grays Harbor County Health Department finds:
 - a. That, it was procured by misrepresentation of any material factor by lack of full disclosure in the application.
 - b. That there has been a violation of any of the conditions contained herein.
 - c. That there has been a significant change in quantity or character of solid wastes or method of waste disposal.
7. This permit or copy thereof shall be displayed where it can be readily referred to by operating personnel.

SPECIFIC CONDITIONS

1. Eliminate surface discharge of leachate into Hoq. River.
2. Complete geohydrological report by Dec. 31, 1985 as outlined in enclosed directive from Washington Department of Ecology.
3. Maintain present ground water and surface water monitoring program. (quarterly through 1985)
4. Operations per application received Feb. 1984.
5. Maintain program to control windblown refuse and litter.
6. Daily cover as weather permits but in no case less than weekly.
7. Record keeping per 173-301-197.
8. Expires December 31, 1985.
